Helpful Tips

The list of names that you see automatically populating are student's names that did the computer station portion immediately before coming to your station

You can sort the populating list by first or last name by clicking on that header at the top of the list

If a student's name cannot be found, refresh the page, and if it still cannot be found, close your browser and log in again

If a student's name cannot be found after refreshing and logging in again, send the student back to the computer station to enter their information again (this does not happen unless they mistakenly skipped this part)

The student's name **MUST** be highlighted so that their picture is changed- double check that it is before clicking "Update Member's Picture"
